

# Stamdata

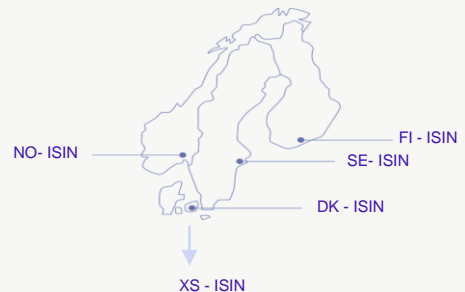

- The leading Source of Nordic Bond Market Information

## Stamdata.com

Stamdata provides market participants access to an unique bond market database accessible through a standard or customizable interface

Stamdata provides the most complete reference data for Nordic fixed income securities and provide integrations into leading portfolio systems such as SimCorp Dimension, Advent APX, Wall Street Systems, SAP, Tieto Probroker, FA Solutions, and more.

### Stamdata

Reference data / corporate actions data / notifications / term sheets & loan agreements

### Analytics and statistics

Our database is constantly evolving to make sure we provide reliable market data at any point in time. For more specialized analytics and reports, our skilled team of analysts can help you stay ahead of competition.

### Web portals

Our digital expertise is brought to the market through multiple web portal solutions. Cutting edge artificial intelligence and algorithms ensures that securities can be created, tracked and shared with relevant third parties instantly. Each portal is tailor-made to a market segment and requires minimal data entry while providing maximum relevance for the end user.

### Integrations

We provide financial market data in custom-built formats to help cover any reference data source or third party software solution our customer prefers. Our clients can request tailored formatting, and we also help provide in depth market reports, league tables, and other statistics reflecting your competitive environment, advanced interests and call calculations.
