ENABLE YOUR SYSTEMS

Calendar feed

Integrate the Bank Holiday Calendar feed into your systems and internal processes to secure accurate holiday schedules, cashflow calculations, settlement instructions and payment details.

This reduces the operational risks that can arise through internal date generation and helps your company avoid significant errors and losses.

FEED – standalone feed for integration into your systems

DATA FORMATS – custom data formats to suit your needs

FORWARD LOOKING – accurate and reliable information about business and non-business days up to 150 – 200 years into the future

SIMPLICITY – up to date information which reflects the latest information available about future holiday dates and business days

STAMDATA.com

Reference data / regulatory data / company data / corporate actions data / default statistics / notifications / term sheets & loan agreements

WEB PORTALS

Our digital expertise is brought to the market through multiple web portal solutions. Cutting edge artificial intelligence and algorithms ensures highest possible data quality and coverage.

eFIRDS.eu

Connecting capital markets with the global LEI system by providing transparency through one single access point

Nordic region | UK & Ireland | Europe | US & Canada | Asia
